# MANAGEMENT OF ELECTRICAL SYSTEMS IN HEALTHCARE PREMISES

to be held on

**FRIDAY 11<sup>th</sup> MAY 2018**

at

THE SAMLESBURY HOTEL  
The Canberra Suite  
Preston New Road, Samlesbury, Preston, PR5 OUL

Are you confident the Management of electrical systems within your Organisation meets best practice? The aim of the conference is to update healthcare professionals on the requirements expected of them within the field of Electrical systems and how this should be achieved.

The Conference will include a working review of managing electrical safety systems, providing good practice and practical guidance to enable the implementation of an effective management system. Describe the roles and duties of the Designated Person, Authorising Engineer, Authorised Persons and Competent Persons, required to meet our Health Technical Memorandum HTM 06.

The day will also provide an informed presentation of the practical approach to the Periodic Inspection and Testing of Healthcare facilities whilst the installation is in use, including a Contractors view of carrying out the inspections and tests whilst minimising disruption to services.

LED lighting has been around for some time now, with Healthcare Organisations completing wholesale replacement of fluorescent lighting, however, research to date has identified a potential risk to users from this type of lighting and the Conference will explore this issue.

Finally, an insight into the proposed changes to BS7671 - 18th Edition of the Wiring Regulations will be provided and how these proposed changes may affect your working environment.

**THIS CONFERENCE WILL BE OF SPECIAL INTEREST TO: ESTATES AND FACILITIES DIRECTORS, ASPIRING DIRECTORS/PROFESSIONALS, OPERATIONAL MANAGERS, ESTATES OFFICERS, CAPITAL AND PROJECT MANAGERS AND THOSE INVOLVED IN THE ACQUISITION, MAINTENANCE AND REFURBISHMENT OF ANY ASPECT OF A HOSPITAL'S ELECTRICAL INFRASTRUCTURE AND RESILIENCE.**
